

Volumetric backlit letter

Can be installed either indoors or outdoors.

Letter: the case made of metal (**recycled aluminium**, brass, stainless steel) etc. If required, painted with powder paint as required by the client. The bottom is of **green cast opal**, to which **energy efficient LED**-modules are attached.

Cabling: as on the backrails solution, cabling will be hidden into the profile. When attached to the wall with distance rods, the cables are drawn either from behind the wall, inside the wall (the milled grooves for the cables should be finished) or with cable conduit on the wall. As to the letters attached to the background plate, from behind the background plate.

Fastening: either on rails, distance rods or background plate as required by the client, depending on the material and size of the letter and place of installation.

Height: 150mm – 3000mm

Depth: 30mm – 200mm
